Introduction

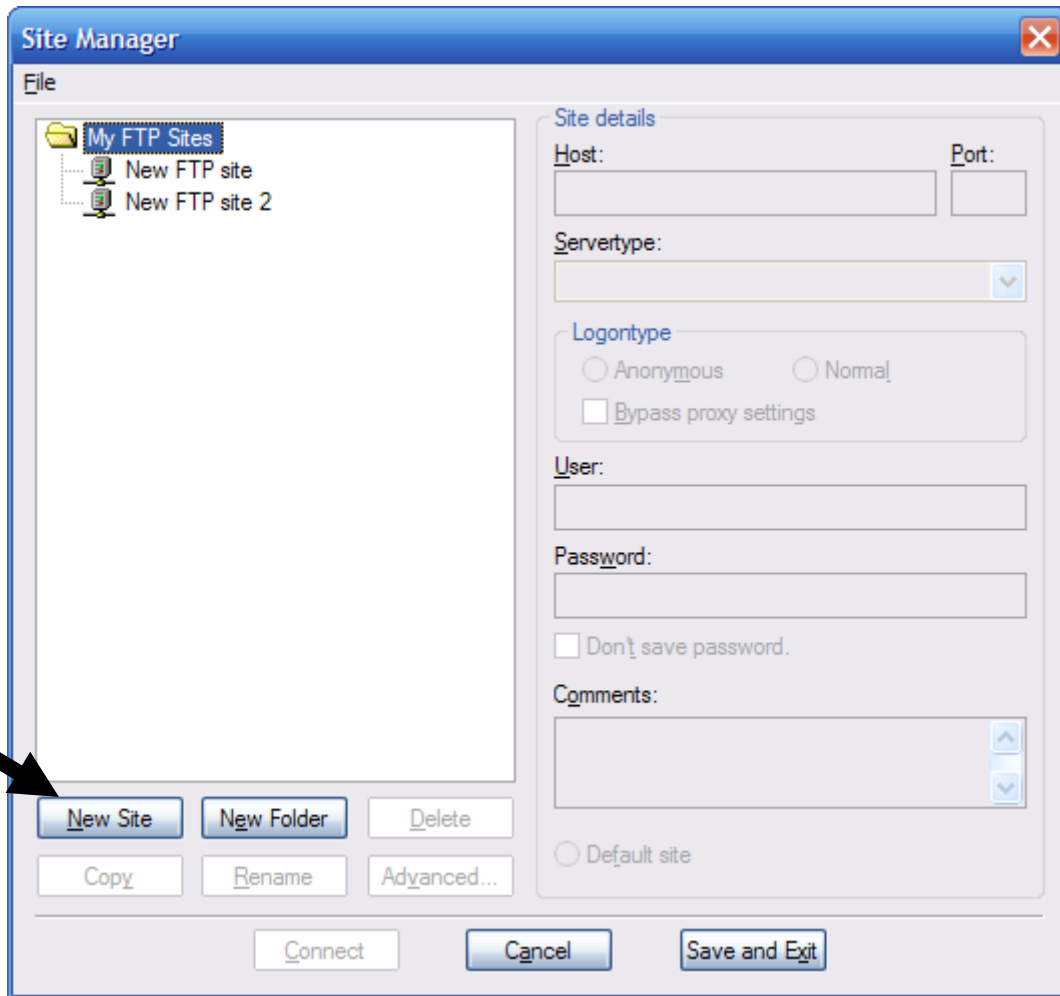

FileZilla is an Open Source File Transfer Protocol (FTP) application. You can use it to connect to any FTP server. In this manual we will connect to the Manhattan College Home Sever.

Once FileZilla is open:

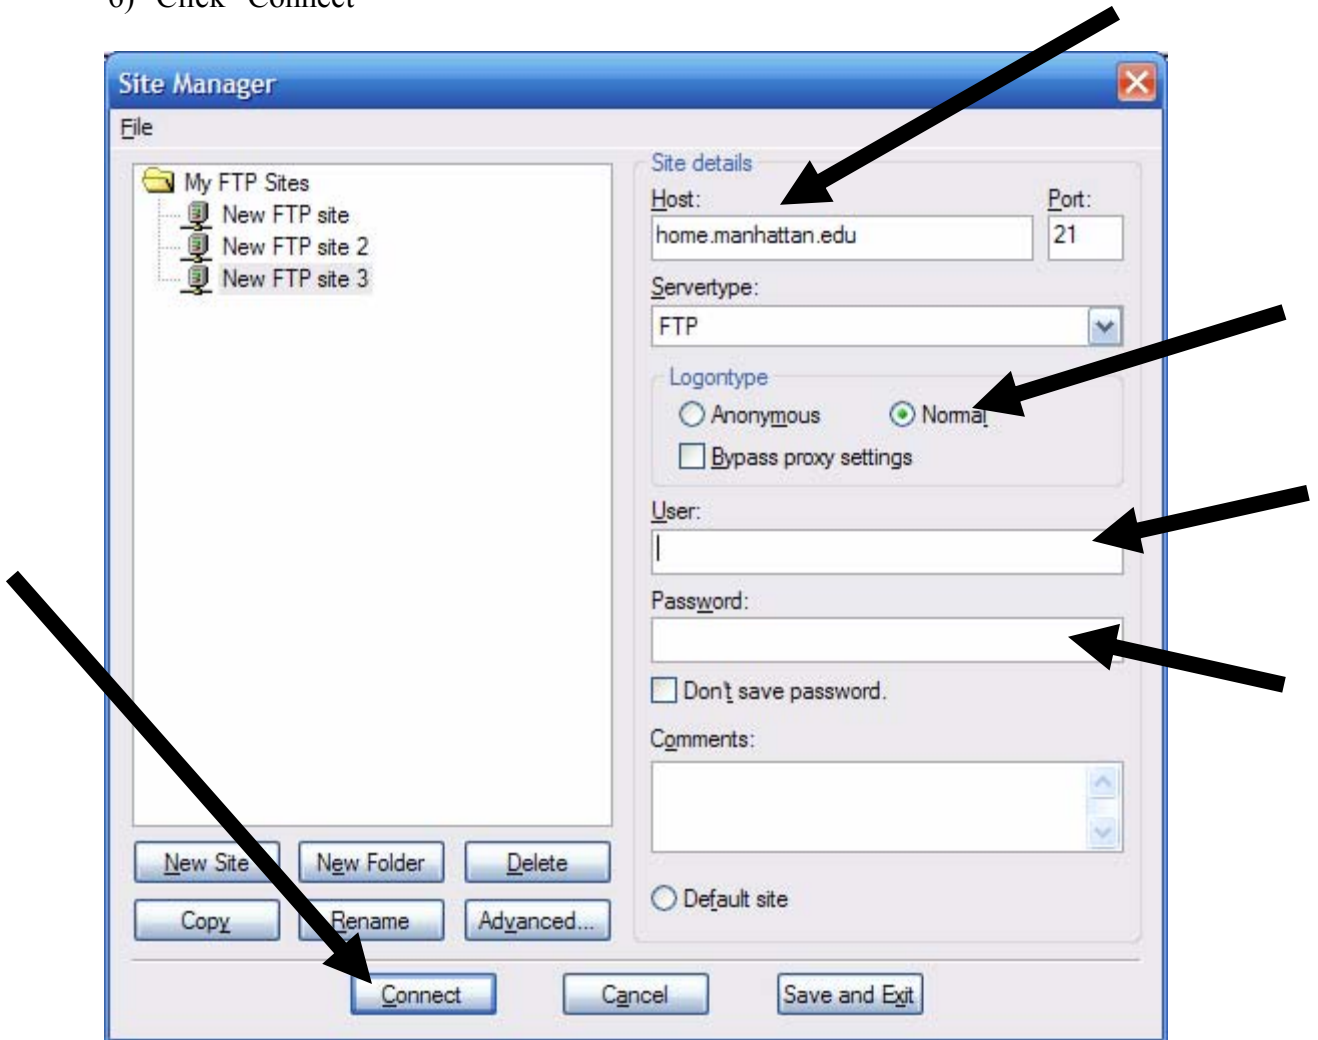

- 1) Click "File"
- 2) Click "Site Manager"

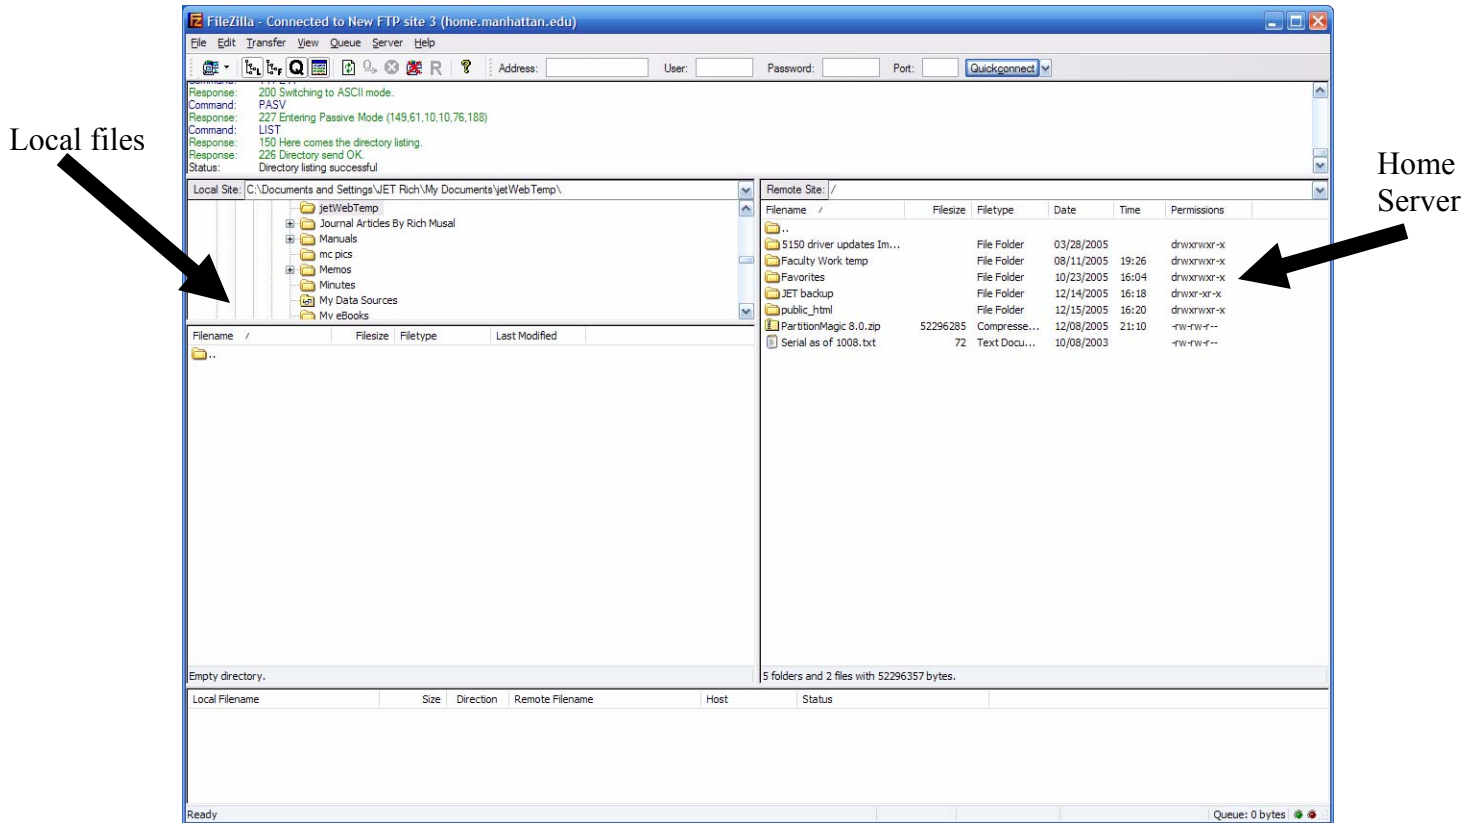

3) Click “New Site”

- 4) Switch from “Anonymous” to “Normal”
- 5) Fill in the following fields.
- 6) Click “Connect”

- 7) The left side contains you local files and the right side contains the files currently on your Home Server.

To transfer files, simply drag and drop.

If you have any further questions about using FileZilla, please contact the JET office at (718)862-7973.
